Allowable Subject Matter

- 2. Claims 1-24 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1,11,21,23, The prior art of record considered alone or in combination neither anticipates nor renders obvious a method for sharing load information between radio network controllers connected to a core network by a first standard interface and to each other by a second standard interface, determining in said first radio network controller over said standard interface a common measurement load value and that a certain type of load condition exists from among a plurality of different types of load conditions indicative of the nature of the type of load condition in said environment where said data is sent via at least one of said multiple Node signaling said second radio network controller over said standard interface that, said certain load condition exists and including a measurement report with said common measurement load value and, in addition, that said certain type of load condition exists with a proposed action using an information element indicative thereof.

The prior art of record provided numerous teachings of synchronization with offsets and timing relationships. However, the prior art of record failed to specifically disclose a method comprising a common measurement load value and that a certain type of load condition exists from among a plurality of different types of load conditions indicative of the nature of the type of load condition in said environment where said data is sent via at least one of said multiple Node signaling said second radio network controller over said standard interface that.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Sheila B. Smith whose telephone number is (703)305-0104. The

examiner can normally be reached on Monday-Thursday 6:00 am - 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Hudspeth can be reached on 703-308-4825. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
